

The Petal

A Monthly Publication by the Wichita Rose Society

Affiliated with the American Rose Society

October 2011

A Brief Synopsis

Information from www.wichitarosesociety.org

Rose Rosette disease is a virus or virus-like disease of roses which has become quite common in the Wichita area. The vector or carrier is a microscopic eriophyoid mite which is blown by the wind into your garden from an infected plant. The infected plant could be some distance away. When the mite feeds on your rose bush the rose becomes infected with the disease. There is no cure.

The symptoms of rose rosette are aberrant growth often characterized by witches broom (often, but not always, red) *see figure 2*, excessive thorniness, and rubbery thorns and canes. The growth is very weird and you will notice it. You should immediately remove the cane at the ground or bud union and bag it. Watch for symptoms to reoccur. Occasionally you can save a

What is Rose Rosette's Disease?

plant by removing the cane before the disease reaches the bud union or roots. If aberrant growth reoccurs, you should remove the plant, bag it tightly and put it in the trash. You should remove as many large roots as possible because they can sprout infected foliage. This should be done with both grafted and own-root roses.

Herbicide damage can look somewhat like rose rosette, and if you are aware of Roundup or some other herbicide being used where it could have drifted onto the

Figure 1: Close up of diseased cane.

rose, you can wait to see if new growth shows damage. It can take up to a year for a rose to recover from herbicide damage. It is always best to remove damaged canes to protect your other roses from potential infection.

For more information on this disease, please join us for our next meeting on Tuesday, October 11. for guest speaker Bob Neier, K-State Research Extension Horticultural Agent presenting Rose Rosettes in full detail!

REFRESHMENT COMMITTEE: SUJA MATHEW—729.0740

WRS Elections

The Nominating Committee will be named in October, and the office candidates will be released and voted on at the November meeting. Please be sure to attend both of these crucial meetings.

From the President's Desk

Joel Weihe

Greetings friends,

The roses are big again - I love Fall! Both our gardens and ourselves are so happy for this cooler weather after the scorcher of a summer we had just experienced. The USDA is going to have to change us to a zone 7 if this becomes a trend. All of our roses survived but not so for all the other perennials. Some just simply burned up. But all that is behind us for now and winter is on the way and soon after comes spring. Spring is every gardeners favorite time of year.

Bob Burill organized and worked Senior Expo 2011 at Botanica. The WRS had a nice booth and talked to lots and lots of people about roses and gardening. It turned out to be a very nice public service from the WRS for our seniors - and for that I thank Bob. It was a lot of fun too!

Coming up on the 22nd of this month is a fundraiser for Botanica. All the garden clubs and societies will have something going on including us. Bob will tell us more about this at the next meeting.

See you all on the 11th!

Articles for the November issue of *The Petal* must be submitted by Nov. 2 to be published.
